

FoamGiant

The revolutionary
foam cannon

The revolutionary foam cannon for fire fighting

FoamGiant revolutionizes firefighting with its unique, patent-pending operating principle. This makes it possible to throw medium expansion foam over impressive distances and cover an area of 140 square meters with only 200 liters of water. This makes FoamGiant an exceptionally water-efficient solution for fighting fires in forests, cities and hard-to-reach areas.

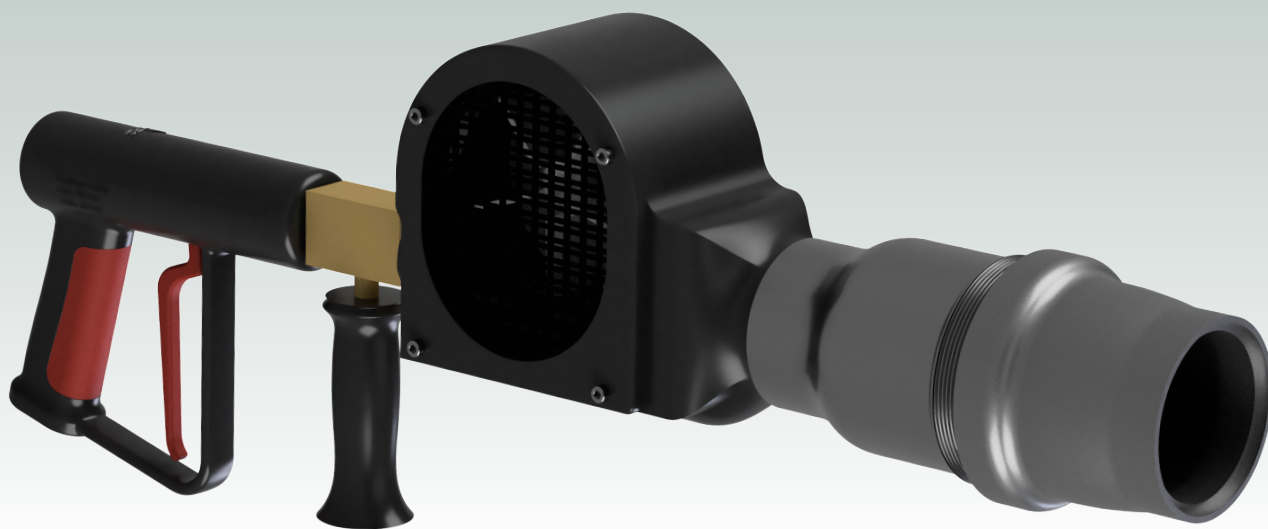

Advantages

- Cost-effective – high expansion rate without the need for a costly compressor.
- Compact and easy to handle
- Compatible with all ultra high pressure firefighting systems (pressure over 100 bar)
- Flexible adjustable throwing distances

Technical data

Flow rate/pressure range	30 to 100 Liter/min at 100 – 250 bar 8 to 26 gallons/min at 1450 – 3625 psi
Expansion rate	30 – 70
Throwing distance	up to 10 meters/32 ft
Hose connection	G 1/4" thread
Weight	approx. 2,8 kg/6 lb
Dimensions	500 x 170 x 105 mm
